## Cloud Managed Services and Security Solutions

 **IT Network Management**

 **Systems Management**

 **Security**

 **Advanced Monitoring**

 **Training**

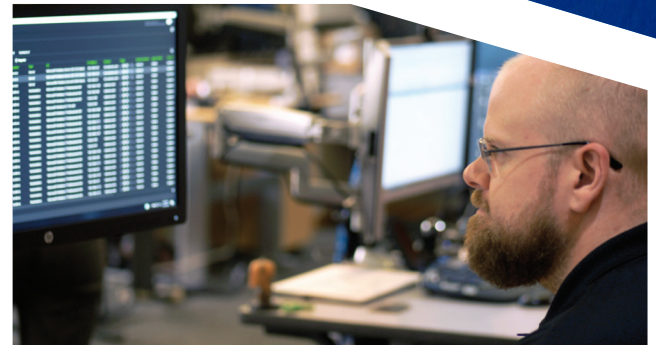

### Eliminate vulnerabilities by shifting to the cloud

When it comes to protecting your technology investments, you want the best of the best. Our certified IT experts have a common goal—to deliver **operational security and integrity 24/7**, so your IT team can focus on delivering services and advancing tech for your tribal organization.

As your cloud managed services and security partner, Arctic IT can help you migrate and secure your operations in the Microsoft Azure Cloud. You will gain strategic advantages such as

- **Stronger security and compliance**
- **Predictable IT costs**
- **Faster support**
- And **time to focus on business objectives**

ArcticCare 365 administers cloud security that evolves with you as you grow, by combining the power and scale of **Microsoft 365** with Arctic IT's team of experts.

### Arctic IT – an Extension of Your Technology Team

Elevate your security posture and allow your internal IT team to focus on proactive strategies with **ArcticCare 365**, our managed cloud services offering.
